

Speaker Model 206

Model 206 is designed for manual channels in small churches and homes, or for higher frequency stops in larger installations. 206 has also been used successfully for all manual channels in smaller buildings. The port for this cabinet is at the rear of the cabinet which means it cannot be mounted against a wall. However, it can be mounted on a wall using a swivel-type adjustable bracket, available from Phoenix. This painted, ported cabinet is for use in pipe chambers, or behind a façade. Also, it can be finished in many colours with matching grill.

Consisting of: vented 6" Altec Lansing mid woofer and ferro fluid, paper tweeter.

Frequency Response: 40Hz to 18KHz

Power Handling: 50 Watts

Cabinet Weight: 8 Lbs.

Dimensions: 12"H x 7.5"W x 9.5"D

Speaker Model 208

Model 208 is designed for higher frequency stops in medium and larger installations. This painted, closed cabinet is for use in pipe chambers, or behind a façade. It can be finished in many colours with matching grill. The power handling is greater than Model 206.

Consisting of: 8 woofer and 1" titanium dome tweeter.

Frequency Response: 50Hz to 18KHz

Power Handling: 75 Watts

Cabinet Weight: 10 Lbs.

Dimensions: 18"H x 12"W x 8"D

Impedance: 8 Ohms
